I am a versatile programmer and game designer, as well as an energetic musician and educator. I have experience programming in C#, Java, Python, HTML, CSS, JavaScript, PHP, R, and C++, and I have utilized tools like Godot, Unity, React, ADO, SQL, and Git. I am excited about using software and music to create inspiring experiences.

Relevant Work Experience

Software Engineer II

Microsoft | March 2025 – Present

Worked on the Xandr Buyside API team to maintain a PHP repository, fixing issues and removing redundant tools. Collaborated with members of the MAP team on a large security project which involved migrating a commonly used class from an older synchronous implementation to a newly written asynchronous implementation in a C# repository.

Software Engineer Intern

Microsoft | Summer 2024

Collaborated with production and design to implement multiple ad display containers to the desired specifications using Preact and JavaScript, HTML and CSS.

Computer Science Supplemental Instructor and Teaching Assistant

Pacific Lutheran University | September 2023 – May 2024

Provided supplemental education by engaging with students in classes, hosting enriching weekly review sessions, and meeting with the professor to assess student progress. Acted as a second resource for students during lab sessions.

Computer Science Student Researcher

Pacific Lutheran University | Summer 2023

Selected by faculty to research the potential of LLM's like ChatGPT for powering decision making and skill building agents in open-ended environments using Minecraft as a simulated environment.

Featured Projects

Upstream, Group Project – Summer 2024 – Spring 2025

Roles: *Programmer / Designer / Composer / Writer* | Tools Used: *Godot, Git*

A physics-based platformer with a minimalist control scheme where the player controls a salmon trying to return home.

ConductVR, Group Project – Fall 2023 – Spring 2024

Roles: *Programming / Design / Sound* | Tools Used: *Godot, Git*

A virtual reality application where users can collaboratively learn and practice the art of conducting an orchestra.

Dunk, Group Project – Summer 2023

Roles: *Gameplay / AI Design / Sound + Music / Art* | Tools Used: *Godot, Git*

An atmospheric, first-person, horror game, with a 64×64 resolution, made for LowRezJam 2023.

Personal Website, Solo Project – Fall 2022

Tools Used: *HTML, CSS, JavaScript, Git*

A simple website designed to showcase my skills and interests as a sort of personal biography and interactive resume. It is styled after a solar system which adjusts its proportions to stay the same no matter the window size or shape.

Education

Bachelor of Arts, Computer Science, GPA: 3.75

Pacific Lutheran University | Graduation: December 2024

Relevant Courses: *Algorithms, Objects and Design, Artificial Intelligence, Robotic Agents, Computer Graphics*

Bachelor of Music, Music Education, GPA: 3.75

Pacific Lutheran University | Graduation: December 2024

Relevant Courses: *Psychology for Teaching, Foundations of Learning, Orchestral Repertoire/Rehearsal*
